Profile Summary

Software Engineering undergraduate with a Higher National Diploma and hands-on experience in MERN stack and Laravel development. Experienced in building scalable, user-friendly web applications and RESTful APIs. Gained practical experience in Full-Stack, Backend, and Frontend development with practical exposure to Node.js, Express.js, React, and MySQL.

Education

Bsc(Hons) In Software Engineering -TOP-UP Cardiff Metropolitan University(United Kingdom) Awarded by ICTBT Campus	<i>In progress-part time</i>
BTEC HND in Computing Software Engineering Pearson Awarded by Esoft Metro Campus	<i>2023 - 2025</i>
Trainee – Full Stack Developer Programme – Open Learning Platform University of Moratuwa	<i>2022</i>
GCE Advanced Level (Physical Science Stream)	<i>2017</i>
GCE Ordinary Level	<i>2014</i>

Projects

Tourism Website - Client Project - Team Collaboration	<i>Tourism Website</i> ↗
- Designed and developed a full-stack tourism web platform showcasing travel destinations, tour packages, and guided experiences across Sri Lanka. - Implemented trip exploration and booking features, allowing users to customize travel itineraries and manage tour selections. Technologies: Laravel, MySQL. Built scalable backend services and applied MVC architecture to maintain clean, modular, and maintainable code.	
Skills and Resource Management System -(Individual project)	<i>SRM System</i> ↗
- Developed a full-stack Skills and Resource Management System to track employee skills and match personnel with suitable projects. - Implemented CRUD operations and role-based categorization, along with a hierarchical skill catalog featuring five-level proficiency tracking for accurate skill assessment. - Built advanced search and filtering to identify personnel by skills, role, experience, and proficiency, and developed an intelligent matching algorithm to rank candidates for projects and prevent workload over-allocation. Technologies: React, Node.js, Express.js, MySQL	
To-Do-App -(Individual project)	<i>To-Do App</i> ↗
- Developed a full-stack To-Do web application to manage personal tasks with add, update, delete, and task tracking functionality. - Implemented secure user authentication(JWT Authentication) and authorization to protect personal data and ensure controlled access.	

- **Technologies:** React, Node.js, Express.js, MongoDB

Simple Billing System -(Individual project)

[Billing System](#) 

- Developed a web-based Billing System to generate bill slips by entering product IDs and quantities, improving accuracy and reducing manual effort.
- Implemented automatic total calculation and a user-friendly interface for efficient bill generation.

- **Technologies:** HTML, CSS, JavaScript, PHP, MySQL

Attendance-Management-System -(Individual Project)

[Attendance System](#) 

- Developed a web-based Attendance Management System with QR code-based check-in/out to track employee attendance, leaves, and working hours.
- Implemented employee features including personal attendance dashboard, leave requests, and attendance history tracking.
- Implemented HR/Manager features for employee management, organization-wide attendance monitoring, leave approval, QR code generation, and report dashboards.

- **Technologies:** React, Node.js, Express.js, MongoDB

Web Application for Velvet Vogue Clothing Store – (Course-work)

[Velvet Vogue Website](#) 

- Developed Velvet Vogue, a multi-page e-commerce platform delivering a seamless shopping experience for casual and formal wear.
- Implemented a dynamic front-end with HTML, CSS, and JavaScript (jQuery + AJAX) to enhance interactivity and user experience.
- **Technologies:** HTML, CSS, JavaScript, jQuery, AJAX

Certifications

JavaScript-Basic(HackerRank): Earned by solving coding challenges.

React Basic(HackerRank): Earned by solving coding challenges.

Postman API Fundamentals Student Expert: Worked with APIs, requests, headers, scripting, and authorization.

SoloLearn-Frontend-For-Beginner: Gained foundational knowledge of HTML, CSS, JavaScript, and Angular.

Trainee – Full Stack Developer Program (University of Moratuwa) (5 Certificates)

Skilled in Python, ML basics, HTML5, CSS3, JavaScript, jQuery, Angular, Node.js, Express, REST APIs, responsive design, UX, and trained in clean code and software engineering practices.

Earned recognition badges through structured projects on public GitHub repositories, with guidance from Nisal Gunawardhana.

API Learning 101, GitHub for Beginners, GitHub Actions – earning Beginner, Intermediate, and Advanced badges , covering GitHub Actions fundamentals and CI/CD pipeline creation.

Skills

Frontend: React, HTML5, CSS3, Bootstrap,Tailwind

Backend: Node.js, Express.js, Laravel, PHP

Databases: MongoDB, MySQL

Tools: Git, GitHub, Postman

Languages: JavaScript, TypeScript, Java, Python, C#(C-Sharp)

Soft skills: Team Work, Communication Skills, Problem Solving, Creativity

Concepts: REST APIs, MVC Architecture, CRUD Operations, Authentication, API Integration
